THE LIGHPAPER

Bolton - BFCL COIN // **CURRENT CHALLENGES AND OPPORTUNITIES WITH BLOCKCHAIN AND CRYPTO CURRENCIES**

If you had have spent \$25 on Bitcoin less than a decade ago you'd have gained \$80 million in value by today. That opportunity has passed. Bitcoin is now valued few thousands USD per coin but the larger cryptocurrency market itself is just coming to full fruition. Since Jan 2017, the stock price of Apple increased by 43.7 percent. Google saw its share price surge from by 32.7 percent. During the same period, the Bitcoin price increased from \$1,000 to \$3,155, by 215 percent, even after an 85 percent plunge in value. So regardless of bear market with a substantial drop, this is still a performance over the last 2 years. Nevertheless, the Blockchain market is volatile and being solely exposed to this market is not a wise investment by any standards. Smart investors are diversified. Therefore we decided to create a new hybrid investment model.

Bolton - BFCL COIN // **THE SOLUTION: TOKENISATION OF 3 PROVEN INVESTMENT ASSETS INTO ONE SECURITY TOKEN**

Bolton Coin (BFCL) has woven together three authoritative investment forces in a balance between the Old and New Economy, bringing together traditional and reliable methods of commodity trading and real estate, further modernised by an eco-sustainable form of cryptocurrency mining. Bolton's secure sources of low-cost mining fees guarantee stable income in the face of potential difficulties, and with investments balanced across three robust realms in which Bolton has decades of experience, even a sustained bear market cannot affect profits. In this way, Bolton Coin (BFCL) is not limited to a single market, granting investors the ability to realise substantial ROI with less risk.

Bolton - BFCL COIN //

BFCL IS NOT JUST A TOKEN, IT'S AN ASSET THAT LET'S THE INVESTOR PARTICIPATE IN THE PROFITS THAT ARE GENERATED. A NEW MODEL.

Recent ICOs have faced regulatory actions resulting in distrust from investors. But Security Tokens from Bolton Coin, which is an STO, not an ICO, offers investors real, tangible assets in which their money is tied to.

During the Security Token public sale, anyone can purchase Bolton Coins (BFCL) which gives access to a private dashboard that allows each Bolton Community member to:

- Choose an investment plan: 12months/24months*
- Track daily ROI
- Withdraw and/or transfer to exchanges

*On a 30-day month, investors will receive up to 4,8 % profits from investments.

Bolton - BFCL COIN //

This is not a startup, but an investment opportunity with a company that already built a solid foundation

Bolton is an established multi billion dollar company, dealing in the holding and managing of assets in high-profit markets. The company has extensive expertise and a proven track record of delivering results. This means primarily to secure a high profit for the clients which has been limited to institutional investors. The Bolton Finance Coin (BFCL Coin) enables retail investors to benefit from Bolton's diversified investment portfolio, bridging the most lucrative investment opportunities with an innovative and high tech investment asset. This means, a portfolio mix of Real Estate, Commodity Trading and Cryptocurrency Mining. This hybrid model of investing is unprecedented and has major benefits for investors compared to traditional investments. Bolton's demonstrated presence in real estate and commodity trading has given Bolton the upper hand in pinpointing profitable regions for real estate investments and traditional mining. The company already operates with low expenditures in the realm of traditional mining and real estate, and expansion efforts are targeted to low-cost areas.

Bolton - BFCL COIN // **A UNIQUE APPROACH BUILT ON A PROVEN FRAMEWORK WITH EXISTING CLIENTS**

This Tokenisation prototype is unique but is built upon already successful models that have endured the test of economic time. Profits are generated and dispersed daily to shareholders' wallets and come from three reliable sources to reduce the impacts of potential shifts that may be experienced in one area. As real estate, commodity trading, and cryptocurrency mining have all proven to be steadfast investments, the unification of the three is both a safe route for the most cautious of investors and a compelling arena for those that wish for a large return on investment. Any Investor is able to use our profit calculator which has been derived from the results our institutional investors have generated on average over the previous years.

Bolton - BFCL COIN // **JOIN A COMMUNITY OF INVESTORS THAT ENJOYS HIGH RETURNS & LOWS RISK AT THE SAME TIME**

This hybrid model of investing is unprecedented has major benefits for investors compared to traditional investments. As the investments are not limited to a single market (i.e. crypto currencies) but spread over several markets, the risk of losing profits due to unforeseen bear markets is very low. Even if there is a bear market in any asset class, only 1/3 of the portfolio would be affected. Therefore you can consider this investment high margin but low risk.

Our customers have responded to our offerings with lots of enthusiasm. Our customers and their success have propelled us to be one of the leading banks that generate profits for our customers ranging from traditional mining, luxury real estate and trading raw materials such as diamonds. The company has been very profitable in these areas and investors have seen significant and consistent growth of their portfolios net worth.
